CAREER OBJECTIVE

Data Analyst and UI/UX Designer with hands-on experience in data analysis, business intelligence dashboards, and user-centered product design. Experienced in Python, SQL, Excel, and Power BI to analyze data, generate insights, and support data-driven decision making.

TECHNICAL SKILLS

Data Analysis: Python (Pandas, Matplotlib, NumPy), SQL (PostgreSQL), Excel, Google Sheets, EDA, Feature Engineering, Customer Segmentation
BI & Visualization: Power BI, KPI Dashboards, Revenue & Trend Analysis, Data Storytelling
UI/UX Design: Figma, Wireframing, Prototyping, Responsive Design, User Research
Tools: Git/GitHub, Vercel, Jupyter Notebook, VS Code

EXPERIENCE

UI/UX Design Intern

Rhinon Labs

Remote

Jun 2025 – Aug 2025

- Designed landing page and chatbot interfaces from scratch across 2+ production-ready deliverables.
- Conducted wireframing, prototyping, and user research to improve usability and visual consistency.
- Leveraged CRM insights to align UI decisions with user behavior, improving engagement metrics.

PROJECTS

Zepto Sales & Delivery Performance Analysis | Python, SQL, Power BI | Link

2025

- Analyzed **41,000 orders** totaling **24.36M in revenue** (AOV 594) to evaluate delivery time's impact on business performance.
- Identified that late deliveries (>15 min) caused a **91% revenue drop** — on-time: 22M vs. late: 2M — establishing delivery speed as a critical KPI.
- Delivered a Power BI KPI dashboard tracking late delivery %, category revenue, and AOV to support operational decision-making.

Credit Card Fraud Detection & Risk Analytics | Python, SQL, Power BI, LLM Integration | Link

2025

- Analyzed 10,000+ transactions to identify fraud patterns using behavioral indicators such as transaction velocity, device trust score, and foreign activity.
- Performed fraud risk analysis using SQL and developed an interactive Power BI dashboard to visualize fraud rate, financial impact, and high-risk segments.
- Integrated an LLM-based module to automatically generate executive-level fraud risk summaries highlighting key drivers and business recommendations.

Telecom Customer Churn Analysis | Python, PostgreSQL, Power BI, Ollama (Gemma3:1b) | Link

2026

- Cleaned and analyzed 7,043 telecom customer records across 21 features using Python; resolved datatype issues in **TotalCharges**, handled 11 missing values, and verified zero duplicate records.
- Wrote **12+ SQL queries** in PostgreSQL to analyze churn drivers across contract type, tenure group, payment method, and service usage; implemented a **3-tier customer risk segmentation** (Critical, High, Medium).
- Built an interactive **Power BI dashboard** with KPI cards, churn segmentation visuals, and dynamic slicers, identifying a **26.54% churn rate**.
- Integrated a local **LLM pipeline using Ollama (Gemma3:1b)** to automatically generate natural-language summaries and analytical insights from churn metrics and dashboard outputs.
